

Student ID:	MAD Quiz 1	Marks: 15 and Duration: 10 minutes
-------------	------------	------------------------------------

1. Replace each and every ?i? where $1 \leq i \leq 13$, with correct keyword in the following code snippet. (13 Marks)

```
import { ?1?, Text, TextInput, ?? } from 'react-native';
import React, {useState} from '?3?';

export default function App() {

  const[inputText, setInputText] = useState('');
  const[submittedText, setSubmittedText] = useState('');

  return (
    <View style={styles.container}>
      <Text style={styles.titleText}>?4?</Text>
      <TextInput
        ?5?={'Write to print below.'}
        style={styles.?6?}
        value={inputText}
        onChangeText={
          ptext => {
            ??(ptext);
          }
        }

        onSubmitEditing={() => {
          if (?8?){
            setSubmittedText(inputText);
          }
        }}
      />
      <Text style={styles.?9?}>{submittedText}</Text>
    </?10?>
  );
}
```

```
const styles = StyleSheet.create({
  container: {
    flex: 1,
    justifyContent: 'center',
    alignItems: 'center',
    padding: 10,
    flexDirection: 'column',
  },
  titleText: {
    fontSize: 20,
    margin: 10,
  },
  textInput: {
    borderColor: 'black',
    margin: 10,
  },
  text: {
    color: 'black',
    margin: 10,
  }
});
```

2. Specify two approaches for implementing platform specific files. (2 marks)
