

Mobile Application Development Lab 2

Md. Atiqur Rahman

January 2024

Instructions

Write a report explaining, how you solved the following tasks with the java script code.

Task 1

Write a JavaScript program to check two given integers whether one is positive and another one is negative.

Task 2

Write a JavaScript program to reverse a given string.

Task 3

Write a JavaScript program which will remove any odd integer from a given array. Use `array.filter()` to solve this task.

Task 4

Write a JavaScript program which will show area of a square if an array given with measurement of a single side. Use `array.map()` to solve this task.

Task 5

Write a JavaScript program which will catch a `1/0` error.
