QUIZ #1

SUMMER SEMESTER, 2024-20225

DURATION: 20 Minutes

FULL MARKS: 15

CSE 4635: Web Architecture

1. What is MVC architecture? 4
2. A web application requires that only logged-in users can access pages under the `/dashboard/*` path. If a user is not logged in, they should be redirected to `/login.jsp`. 4+2+1
 - (a) Write a Java Servlet Filter that checks whether a user session exists and contains a `"user"` attribute. If not, redirect the user to `/login.jsp`. Your filter should map to `/dashboard/*`.
 - (b) In the `LoginServlet`, write the code snippet that creates a session and stores the logged-in user's username (received from a form field named `"username"`) into the session.
 - (c) Write one line of code that a `LogoutServlet` would use to completely invalidate the user's session.
3. Explain the Servlet life cycle. 6
