Lab 07 Task: Hello Burger

Your company, Hello Burger, is expanding its headquarters and requires a new network design to support various departments. The HB headquarters consists of the following departments across multiple floors: **Engineering** (Floor 1), **Marketing** (Floor 2), **Sales** (Floor 3), **Administration** (Floor 4), **Management** (Floor 5).

Suppose they all share the prefix **192.(i).(i+3) % 10**. Below are the required devices for each of the departments:

$E(n) = 33$	(Engineering)
$M(n) = 7$	(Marketing)
$S(n) = 14$	(Sales)
$A(n) = 12$	(Administration)
$G(n) = 30$	(Management)

where, i is the last two digits of your id

Task Requirements

1. **Topology Implementation:** Implement and configure the topology in omnetpp. For each network, you need to add a minimum of 3 end devices.
2. You need to use static routing, you can't use automatic routing from the configurator

Lab 07 Grading Criteria

1. **Topology & Router Configuration (30 pts)**
 - Correct topology design (15 pts)
 - Correct ip assignment (15 pts)
2. **Routing (10 pts)**
 - Correct Routing configuration to ensure connectivity (10 pts)
3. **Total: 40 pts**
