

CSE 4018: Structured Programming Lab

LAB 5

Objectives

- Exploring Conditional statements
- Introduction to loop

Tasks

1. Write a program that reads two numbers from the user and prints all the numbers in between them(including the given numbers) along with the information whether they are odd or even.

Sample Execution

```
Enter two numbers:  5 8
5 is odd
6 is even
7 is odd
8 is even
```

2. Write a program that reads a number from the user and checks whether the number is prime or not.

Sample Execution

```
Enter a Number:  13
13 is a prime number
```

You may search online to find what a prime number is.

3. Write a program that reads two numbers from the user and finds the sum of the numbers between them (including the given numbers) which are divided by 5

Sample Execution

```
Enter two numbers:  4 12
Sum is:  15
```
